

PNEUCO. Model SA20

BAG-IN-BOX FILLER

The **PNEUCO SA20** is a fully customisable filling machine suitable for filling flexible bags from 2 to 25 litres or rigid containers from 2-200 litres. Bag-in-Box technology is an ideal and cost effective way to deliver a wide range of products, including wine, paint, egg mix, chemicals, syrups, mayonnaise, juices, post-mix and dairy products or any other product that can be pumped.

The machine features a demountable frame and components, a table that is adjustable in four directions (for air free filling) including height and an adjustable control head for optimal operator convenience. The filler head is adjustable both longitudinally and for height to allow for filling in any bag wherever the fitment is placed.

It is available with an optional bag vacuum system with nitrogen injection, which enables the filling of products that are adversely affected by residual oxygen.

The **PNEUCO SA20** can accommodate caps and taps in malleable rubber or rigid nylon. There is a wide range of options available to suit your dispensing needs.

PLC based controls are used to monitor and adjust fill volumes with a remarkable accuracy of plus or minus 0.3% or better, under optimum conditions. Operators are provided with information via the touch screen and are able to manually override volume and timer settings if desired. The **PNEUCO SA20** operates automatically once the bag is loaded.

The New Zealand made **PNEUCO SA20** is manufactured primarily in stainless steel and other food grade approved materials, warranted for 12 months, comes with a complimentary set of spare nose-seal rings and meets all normal food code requirements.

Power	240/50, 110/60
Power consumption	100 Watts
Air pressure	Maximum 8 Bar
Air consumed	6 Nl/h @ 6 Bar
Height	1600 mm
Length	800 mm
Width	800 mm
Weight	75 kg

Please note: The specifications outlined above are to be taken as approximate only, as each machine, whilst standardised in design, is built to specific customer requirements and all data given above may change accordingly.

A fully automated version (PNEUCO A20) of this semi-automated filler is available.

PNEUCO can be contacted for any of your filling requirements whether it is Bag-in-box, IBC, pouch, powder, bottle, or drum.

Better products, better service.....
